ELSEVIER

Operations Research Letters 24 (1999) 249–250

operations research letters

Author Index to Volume 24

The issue number is given in front of the page numbers

Acevedo, J. and E.N. Pistikopoulos, An algorithm for multiparametric mixed-integer linear programming problems (3) 139–148
Anily, S., J. Bramel and A. Hertz, A $\frac{5}{3}$-approximation algorithm for the clustered traveling salesman tour and path problems (1–2) 29– 35
Aviv, Y. and A. Federgruen, The value iteration method for countable state Markov decision processes (5) 223–234

Ball, B., *see* Kenyon, C.M. (4) 181–185
Bandelt, H.-J., M. Oosten, J.H.G.C. Rutten and F.C.R. Spieksma, Lifting theorems and facet characterization for a class of clique partitioning inequalities (5) 235–243
Baptiste, Ph., An $O(n^4)$ algorithm for preemptive scheduling of a single machine to minimize the number of late jobs (4) 175–180
Bertsimas, D., C. Teo and R. Vohra, On dependent randomized rounding algorithms (3) 105–114
Bramel, J., *see* Anily, S. (1–2) 29– 35
Bäuerle, N., How to improve the performance of ATM multiplexers (1–2) 81– 89

Carøe, C.C. and R. Schultz, Dual decomposition in stochastic integer programming (1–2) 37– 45
Chakraborty, N.R., *see* Das, P. (1–2) 57– 63
Chaudhuri, P.K., *see* Das, P. (1–2) 57– 63
Chern, M.-S., *see* Teng, J.-T. (1–2) 65– 72
Creavin, M., *see* Healy, P. (1–2) 73– 80
Croce, F.D., V.Th. Paschos and A. Tsoukias, An improved general procedure for lexicographic bottleneck problems (4) 187–194

Das, P., N.R. Chakraborty and P.K. Chaudhuri, A polynomial time algorithm for a hemispherical minimax location problem (1–2) 57– 63

Federgruen, A., *see* Aviv, Y. (5) 223–234

Goldberg, R.R. and J. Shapiro, A tight upper bound for the k-partition problem on ideal sets (4) 165–173

Healy, P., M. Creavin and A. Kuusik, An optimal algorithm for rectangle placement (1–2) 73– 80
Hertz, A., *see* Anily, S. (1–2) 29– 35
Hochbaum, D.S. and G.J. Woeginger, A linear-time algorithm for the bottleneck transportation problem with a fixed number of sources (1–2) 25– 28

Kenyon, C.M., S. Savage and B. Ball, Equivalence of linear deviation about the mean and mean absolute deviation about the mean objective functions (4) 181–185
Kim, D. and P.M. Pardalos, A solution approach to the fixed charge network flow problem using a dynamic slope scaling procedure (4) 195–203
Kuusik, A., *see* Healy, P. (1–2) 73– 80

Elsevier Science B.V.

Kyriakidis, E.G., Characterization of the optimal policy for the control of a simple immigration process through total catastrophes (5) 245–248

Mak, W.-K., D.P. Morton and R.K. Wood, Monte Carlo bounding techniques for determining solution quality in stochastic programs (1–2) 47– 56
Mangasarian, O.L., Arbitrary-norm separating plane (1–2) 15– 23
Morton, D.P., *see* Mak, W.-K. (1–2) 47– 56
Moukrim, A., Optimal scheduling on parallel machines for a new order class (1–2) 91– 95

Oosten, M., *see* Bandelt, H.-J. (5) 235–243

Pardalos, P.M., *see* Kim, D. (4) 195–203
Paschos, V.Th., *see* Croce, F.D. (4) 187–194
Pistikopoulos, E.N., *see* Acevedo, J. (3) 139–148

Reed, B., Edge coloring nearly bipartite graphs (1–2) 11– 14
Rosa, C.H. and S. Takriti, Improving aggregation bounds for two-stage stochastic programs (3) 127–137
Rutten, J.H.G.C., *see* Bandelt, H.-J. (5) 235–243

Savage, S., *see* Kenyon, C.M. (4) 181–185
Schultz, R., *see* Carøe, C.C. (1–2) 37– 45
Schuurman, P. and G.J. Woeginger, Approximation algorithms for the multiprocessor open shop scheduling problem (4) 157–163
Shanthikumar, J.G., *see* Swaminathan, J.M. (5) 213–221
Shapiro, J., *see* Goldberg, R.R. (4) 165–173
Spieksma, F.C.R., *see* Bandelt, H.-J. (5) 235–243
Srinivasan, R., *see* Swaminathan, J.M. (3) 115–125
Swaminathan, J.M. and J.G. Shanthikumar, Supplier diversification: effect of discrete demand (5) 213–221
Swaminathan, J.M. and R. Srinivasan, Managing individual customer service constraints under stochastic demand (3) 115–125

Takriti, S., *see* Rosa, C.H. (3) 127–137
Teng, J.-T., M.-S. Chern, H.-L. Yang and Y.J. Wang, Deterministic lot-size inventory models with shortages and deterioration for fluctuating demand (1–2) 65– 72
Teo, C., *see* Bertsimas, D. (3) 105–114
Tsoukias, A., *see* Croce, F.D. (4) 187–194
Tunçel, L., On the condition numbers for polyhedra in Karmarkar's form (4) 149–155

Vohra, R., *see* Bertsimas, D. (3) 105–114

Wang, Y.J., *see* Teng, J.-T. (1–2) 65– 72
Whitt, W., Using different response-time requirements to smooth time-varying demand for service (1–2) 1– 10
Whitt, W., Decomposition approximations for time-dependent Markovian queueing networks (3) 97–103
Whitt, W., Dynamic staffing in a telephone call center aiming to immediately answer all calls (5) 205–212
Woeginger, G.J., *see* Hochbaum, D.S. (1–2) 25– 28
Woeginger, G.J., *see* Schuurman, P. (4) 157–163
Wood, R.K., *see* Mak, W.-K. (1–2) 47– 56

Yang, H.-L., *see* Teng, J.-T. (1–2) 65– 72
